

Titan FTP Server Enterprise Edition

Web User Interface

Data powers your company. Whether in the home office or abroad, your staff, clients, and partners need to access data at their own pace and without burdening your technical support team with a multitude of client-specific configuration setbacks.

Titan FTP Server Enterprise Edition offers an optional web user interface (WebUI) for convenient access to data. With the Titan WebUI, you can allow an unlimited number of associates to browse data as easily as answering an email. The Titan WebUI is completely operating system-independent and runs in the latest versions of the most popular browsers.

The screenshot shows the Titan FTP Server Web User Interface. At the top, there is a header bar with the Titan FTP Server logo on the left, and "Help" and "Logout" links on the right. Below the logo, the text "Titan FTP Server" is displayed. To the right of this text, it says "8.99 MB used by a". Below the header bar, there are two buttons: "New Folder" (with a folder icon) and "Upload" (with a cloud and arrow icon). Below these buttons, there is a pagination control showing "Items per page: 15" and "1" of 1 items. Below the pagination control, there is a table with columns: "Name", "Size", "Type", and "Modified". The table contains two rows: "Archive" (Folder, Apr-01-2021 03:00 PM GMT) and "Data" (Folder, Mar-30-2021 09:00 PM GMT). Each row has an information icon and a download icon. Below the table, there is a message: "DRAG AND DROP TO UPLOAD AND DOWNLOAD" with an "OK Got it" button.

New Folder Upload

Items per page: 15 « 1 »

Name	Size	Type	Modified
Archive		Folder	Apr-01-2021 03:00 PM GMT
Data		Folder	Mar-30-2021 09:00 PM GMT

DRAG AND DROP TO UPLOAD AND DOWNLOAD OK Got it

No Installation Required

Customers and support personnel don't need the added complication of downloading and navigating file transfer software. Different companies use a wide range of FTP clients; others have company-wide policies prohibiting new software downloads. The Titan WebUI eliminates both problems.

Unlimited Connections

Don't worry about license counts and connections. The Titan WebUI allows access to an unlimited number of internal and external users. This is an all-in-one solution for employees, customers, and partners.

Simplified Support

With the Titan WebUI, support personnel don't need to learn the quirks of a hundred FTP clients. Consolidate your responsibilities and direct traffic to one simple interface. That's dozens of tech support requests that will never come across your desk.

Effortless Interface

Your clients don't need any specialized knowledge to access files with the Titan WebUI. Users can simply log in and access files or upload their own data to the Titan server. Titan's intuitive user interface was designed with end-users in mind, to streamline file transfers and keep business running smoothly.

Titan WebUI Benefits:

No more third-party software

Intuitive user interface

Unlimited internal & external users

Operating-system independent

Compatible with most browsers

Titan FTP Server is a product of South River Technologies (SRT), an innovator in secure file management software. More than 100,000 customers in 140 countries use SRT's software to make remote file access and collaboration more efficient for their customers, partners, and distributed workforce.
